Introduction & Purpose

Wardrobe AI is an AI-powered dress colour matching assistant that helps users choose suitable clothing combinations from their wardrobe.

Reduce confusion while choosing outfits

Identify clothing types and colours

Suggest suitable colour combinations

Provide an outfit match score

Help users dress with more confidence

From **wardrobe confusion** → to **confident outfit selection.**

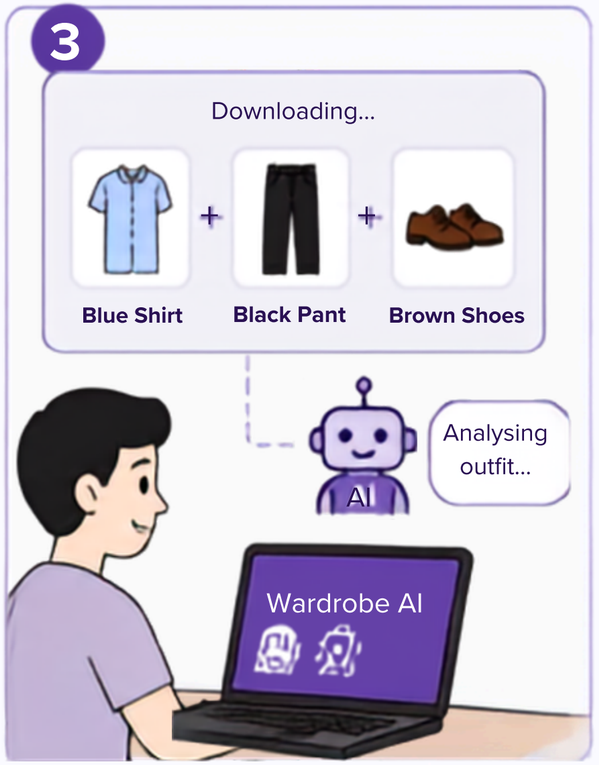

Storyboard - Ravi’s Story

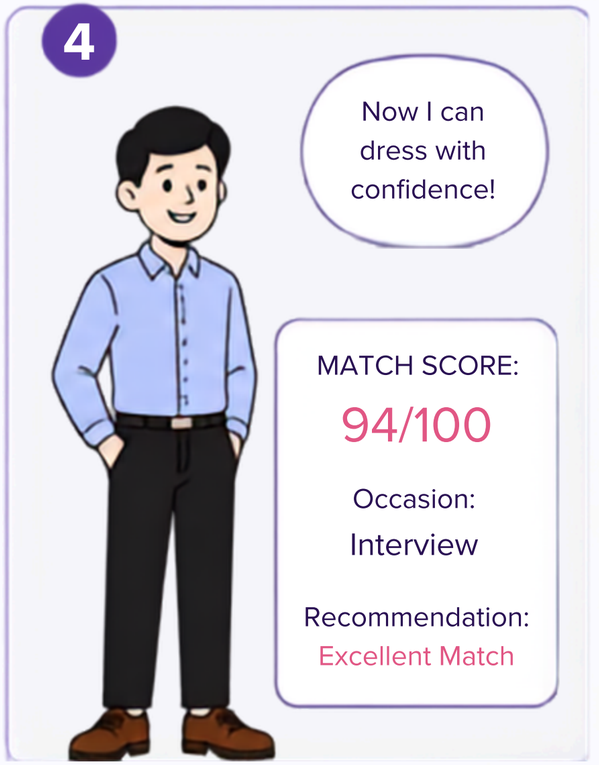

Ravi has many clothes but is unsure which colours match.

He lacks confidence and feels shy asking others for advice.

Wardrobe AI analyses Ravi's outfit combination.

Ravi gets a high match score and dresses with confidence.
